VapeSling® Custom “Half-Pint” Cradle

Complimentary Aperature Choice

Your Choice of Aperature for your VapeSling® Cradle purchase

All VapeSling® cradles install on all 510 batteries/mods on the market. Ego style batteries also install easily.

Note: EGO style ATOMIZER requires Ego to 510 adapter.

•The Large aperture is useful for quick and easy install, between attys or battys.

An Ego battery 510 (top section) fits snug thru this hole.

The EGO threads remain below the cradle.

•The Tight Aperature is ideal for all atty and batty types (pens to Mods). Therefore, this has become our standard size aperture.

•Your order ships with our standard Tight Aperature and Light Silver color stitching when no order request is made for cradle options.

Large Aperature
